LOGIN PROCESS

FIRST TIME LOGIN

For your first login, you will be emailed a one-time secure login link.

- 1 ENTER YOUR EMAIL ADDRESS
- 2 OPEN YOUR EMAIL CLIENT ON THE SAME DEVICE
- 3 CLICK “SIGN IN TO ENCRYPTSCAN”

Please note: the email may take up-to a few minutes to arrive.

LOGIN LINK COMMON ISSUES

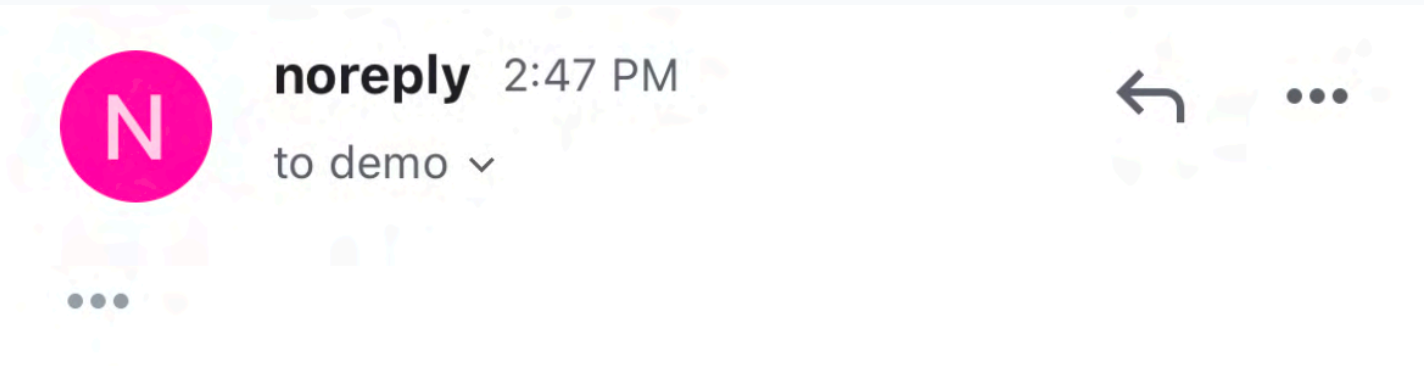

My login link never arrived?

Login links usually arrive instantly, but sometimes they can take up to a few minutes to arrive. If after a few minutes, you may try and request a new login link. Please ensure if you have requested multiple login links that you click the most recent link in your inbox. When requesting a new link, all previous links will be invalidated.

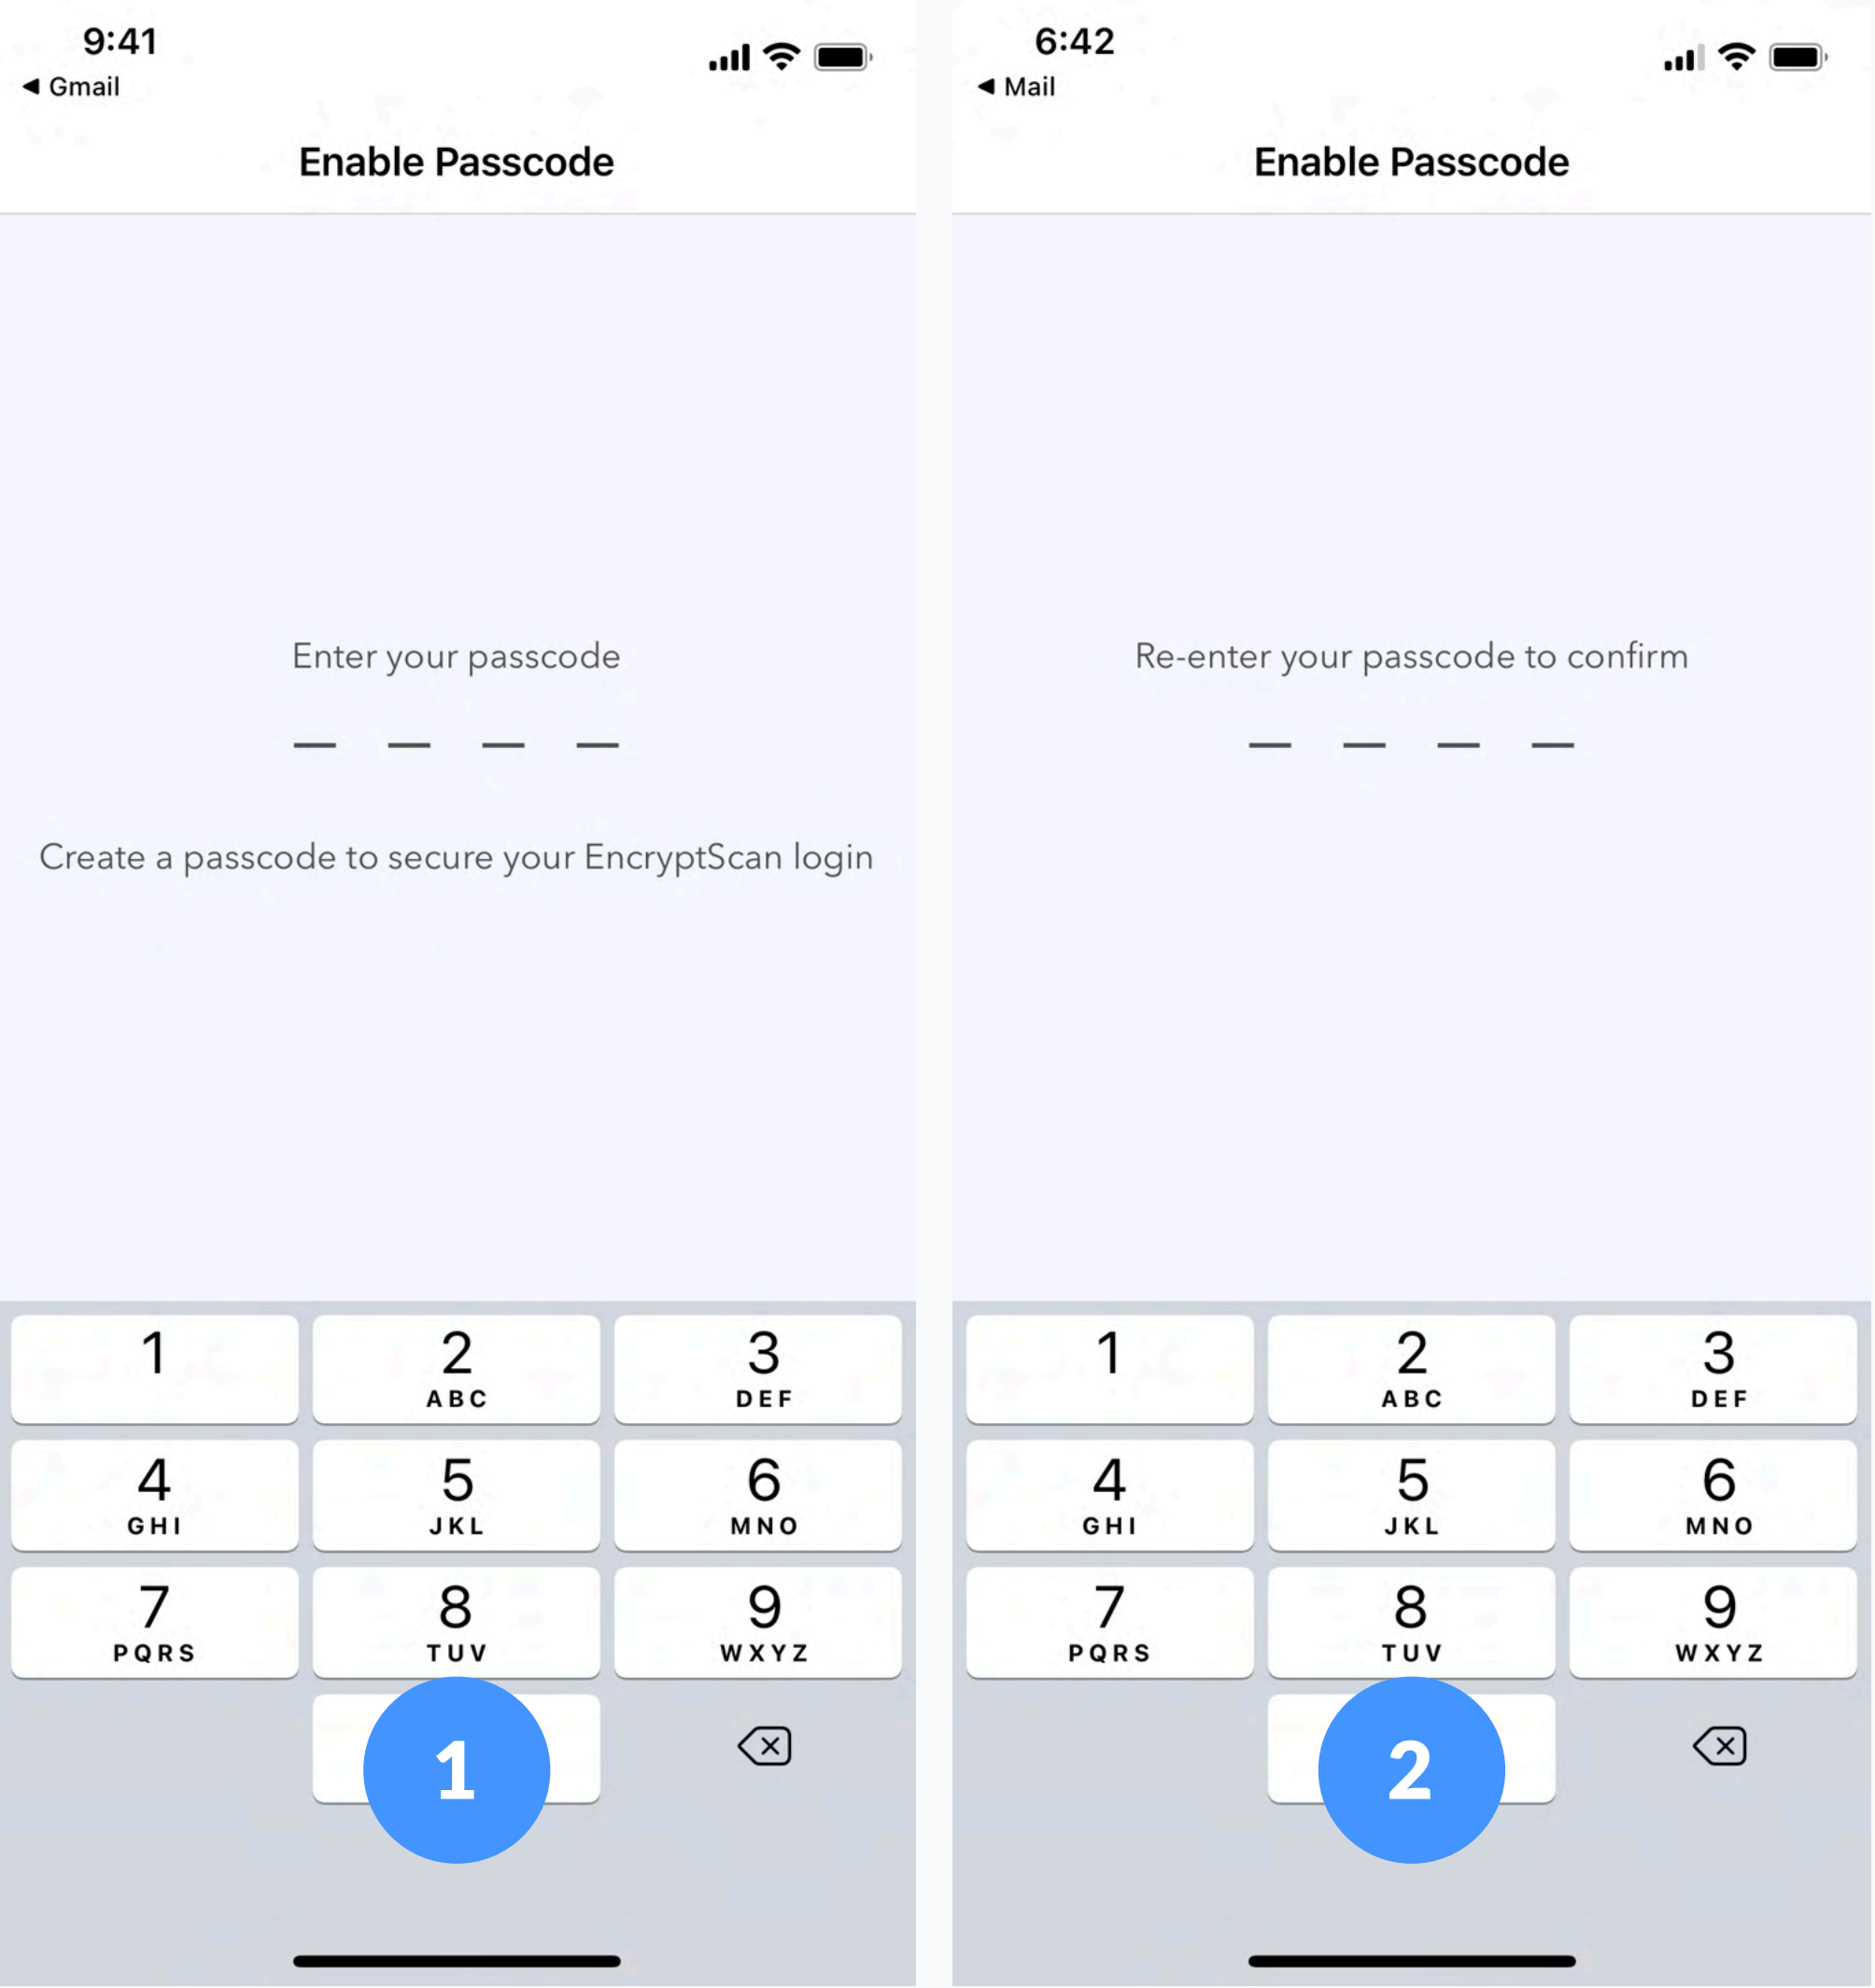

My login link email looks empty

If you request more than one email link, certain email clients (Gmail in particular) will truncate messages that appear the same if they are received in a short period of time. If you receive a login link email that looks like this:

Simply click the “...” button to reveal the actual email content.

CREATE YOUR PIN

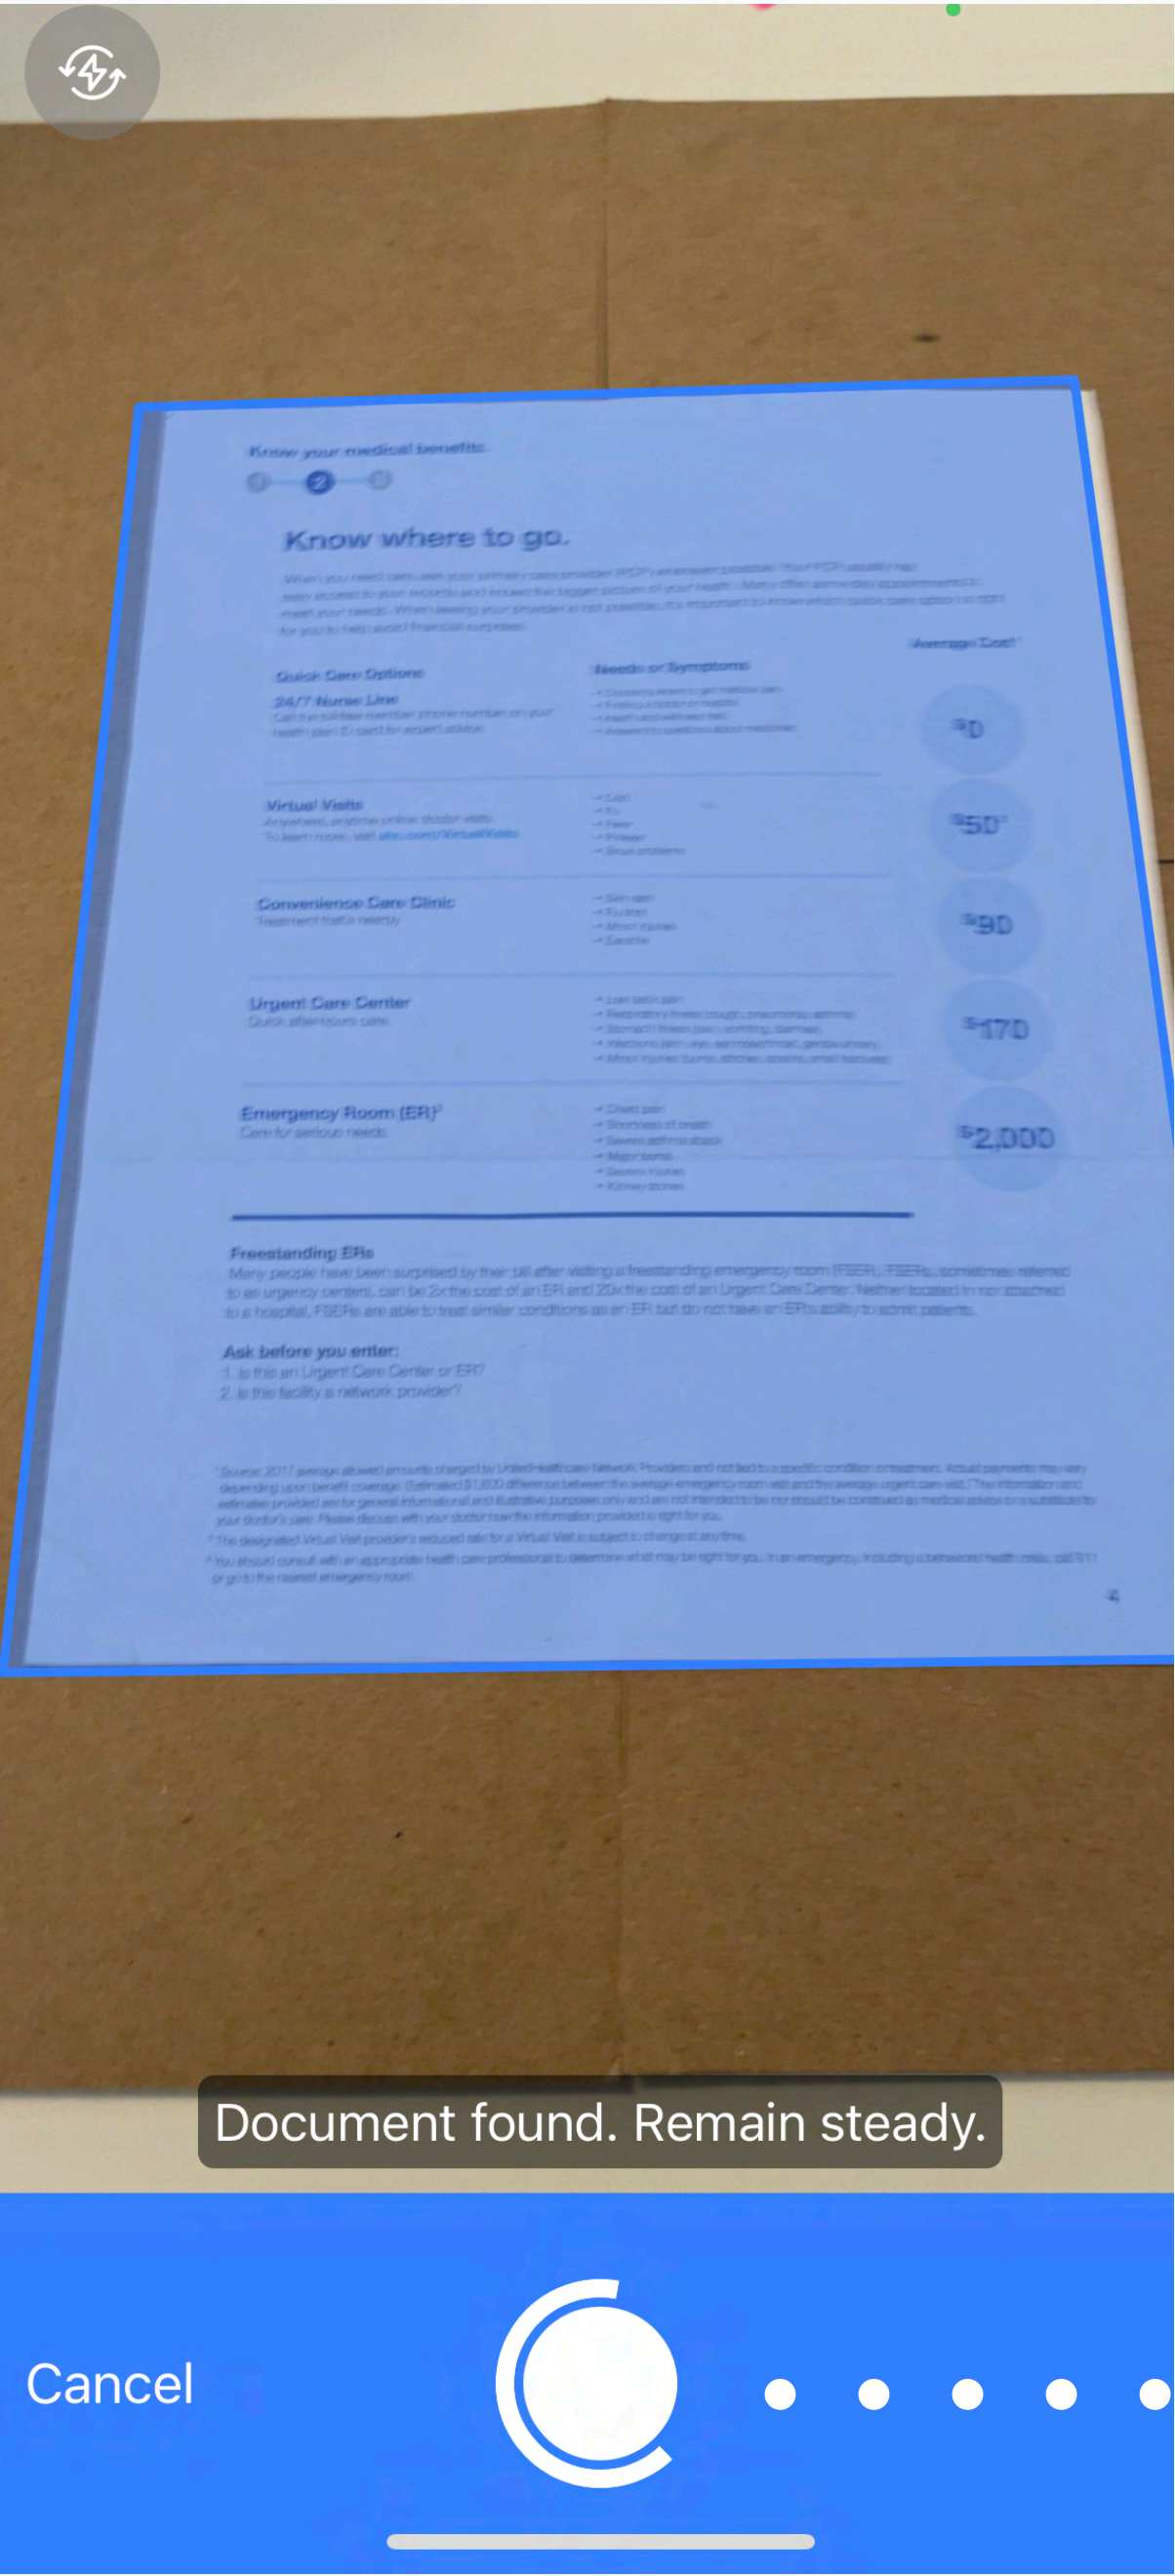

This PIN code is the default authentication method used if facial or fingerprint recognition is not supported on your device.

- 1 CREATE A 4 DIGIT PIN**
- 2 RE-ENTER PIN TO CONFIRM**

DOCUMENT SCANNING

CHANGE FLASH
SETTING

Document found. Remain steady.

CANCEL SCANNING

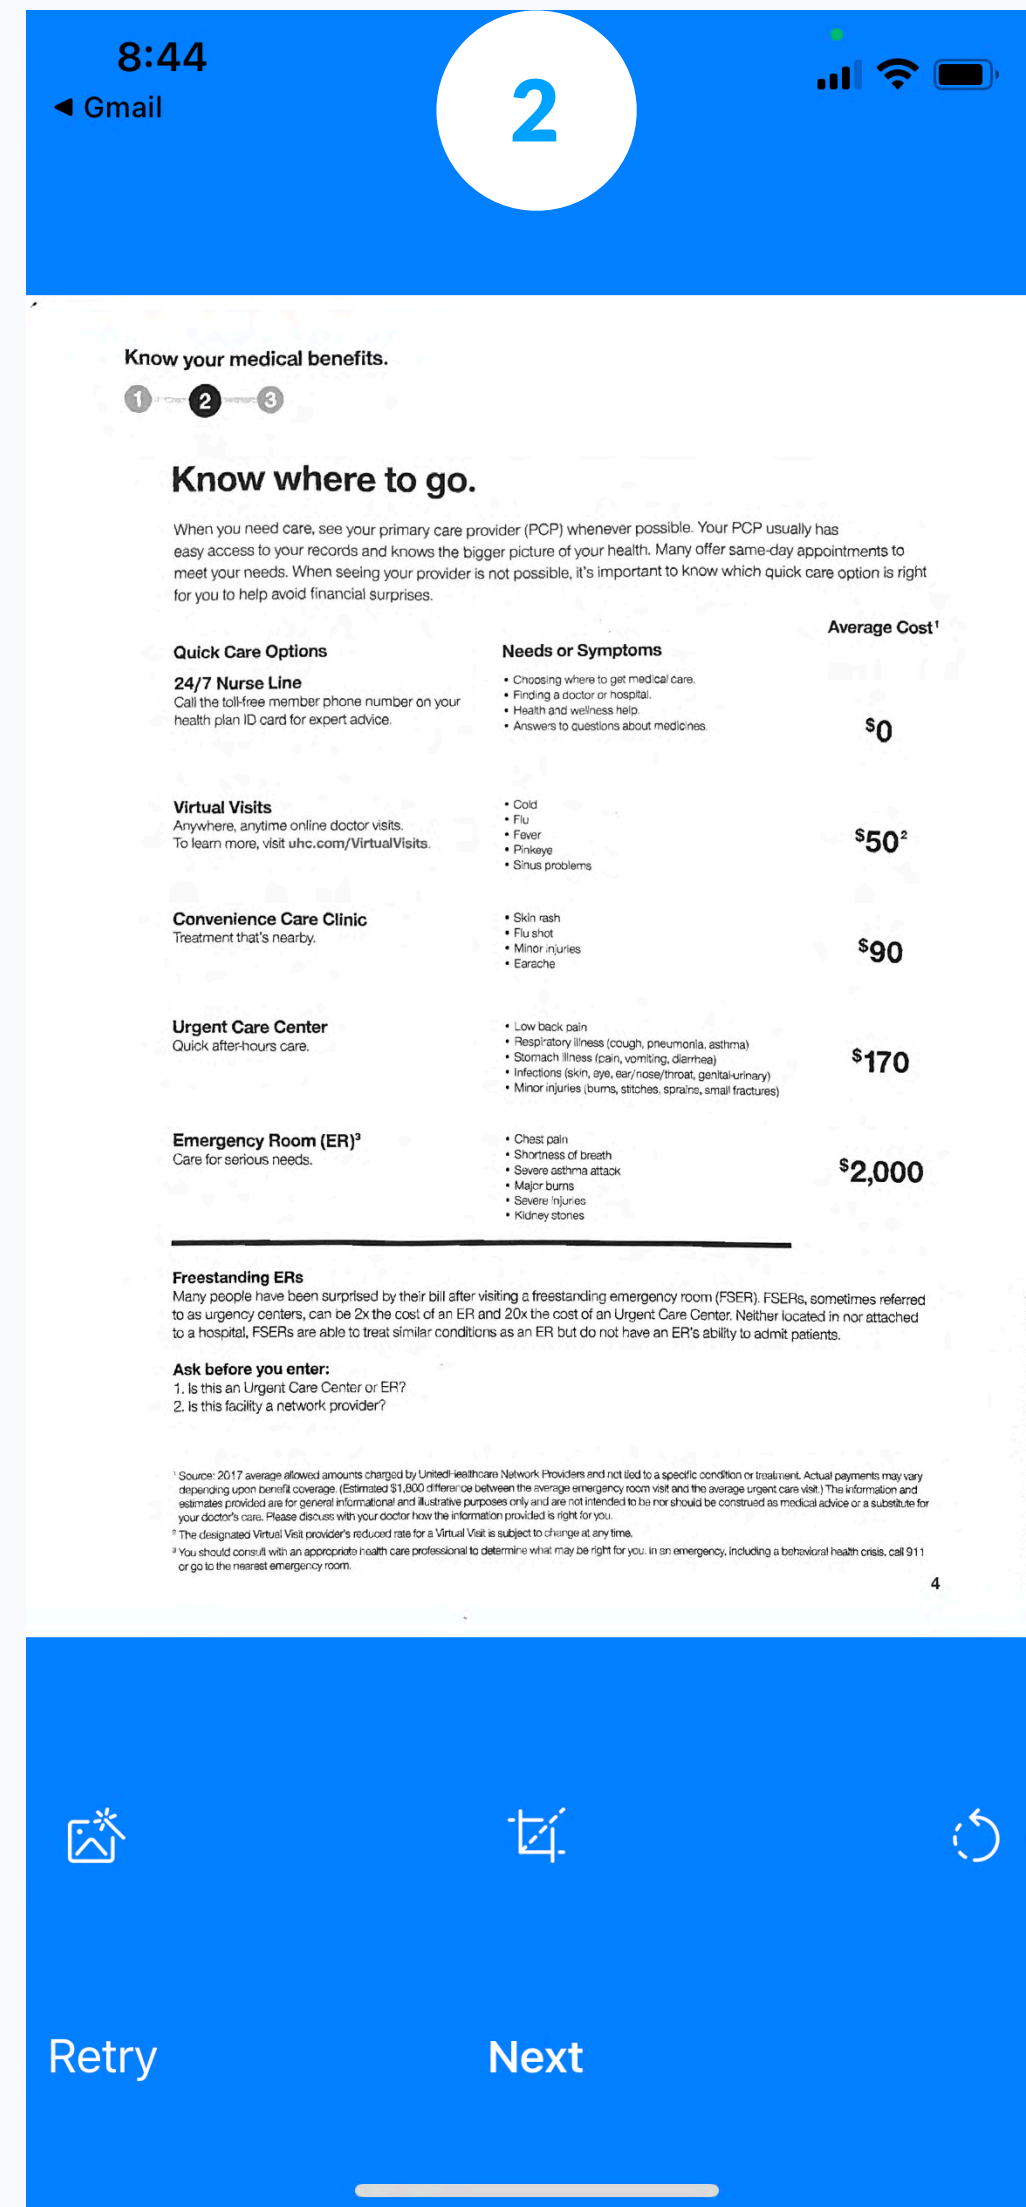

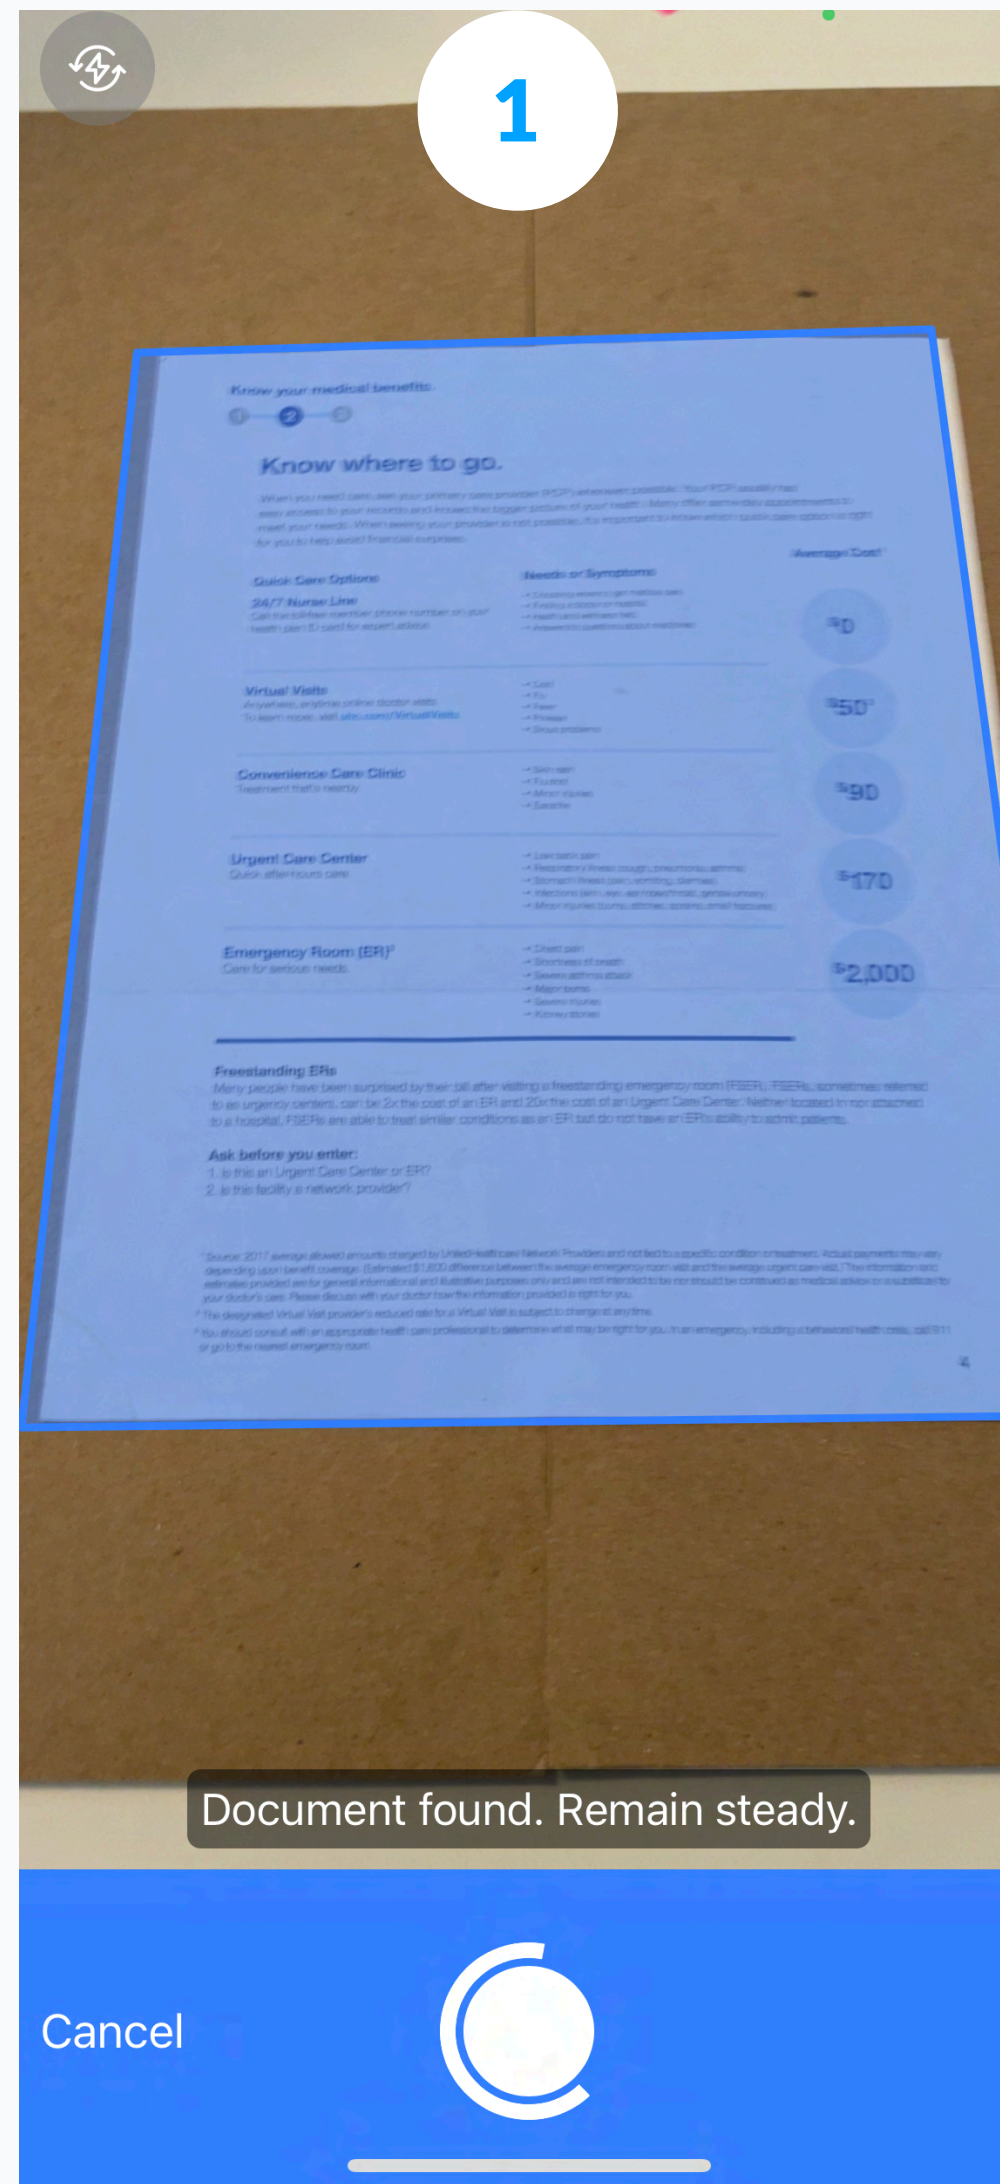

Cancel

MANUAL CAPTURE
BUTTON

DOCUMENT SCANNING

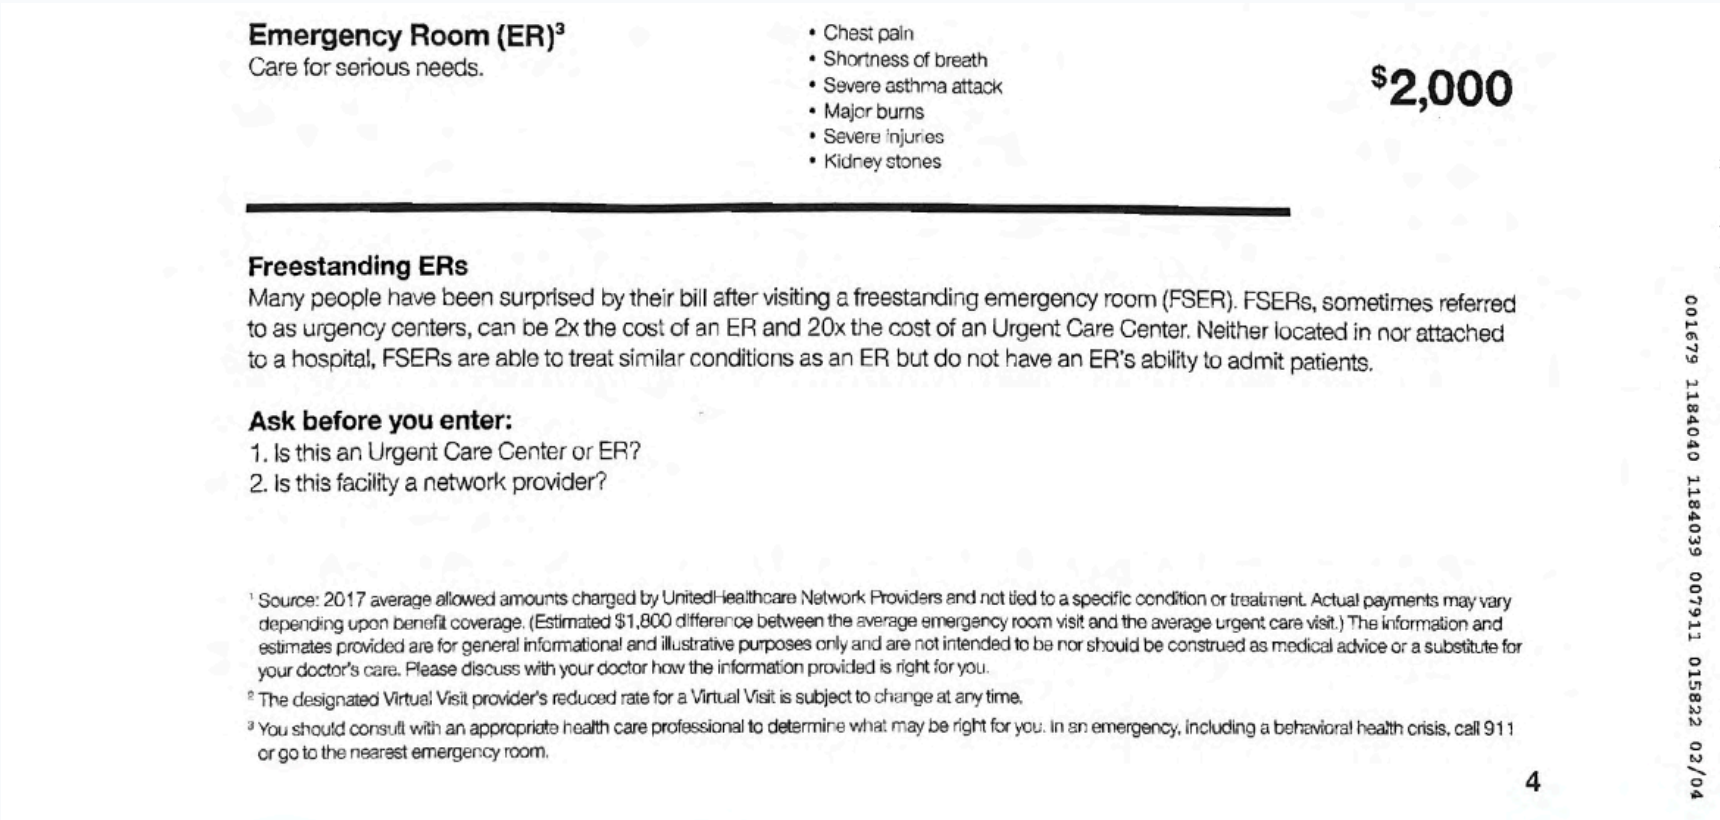

EncryptScan supports automatic edge detection and capture of documents. Manual capture can also be done by tapping the white circle capture button.

All pages scanned during a scanning session will become one PDF document.

- 1 **POSITION CAMERA OVER DOCUMENT SO ALL 4 CORNERS ARE VISIBLE**
- 2 **HOLD YOUR PHONE STEADY AND THE DOCUMENT WILL AUTOMATICALLY BE CAPTURED**

Scanning tips:

- Scan on a contrasting background when possible
- If the blue document overlay does not appear, try moving your phone closer/farther away from the document, ensuring all 4 corners are within view
- Try to keep your phone parallel (directly over) the document
- Scan in a well-lit area, or turn on the flash via the lightning bolt icon in the top left corner
- Tap the screen to focus

APPLY FILTER

ROTATE PAGE

RE-SCAN PAGE

Retry

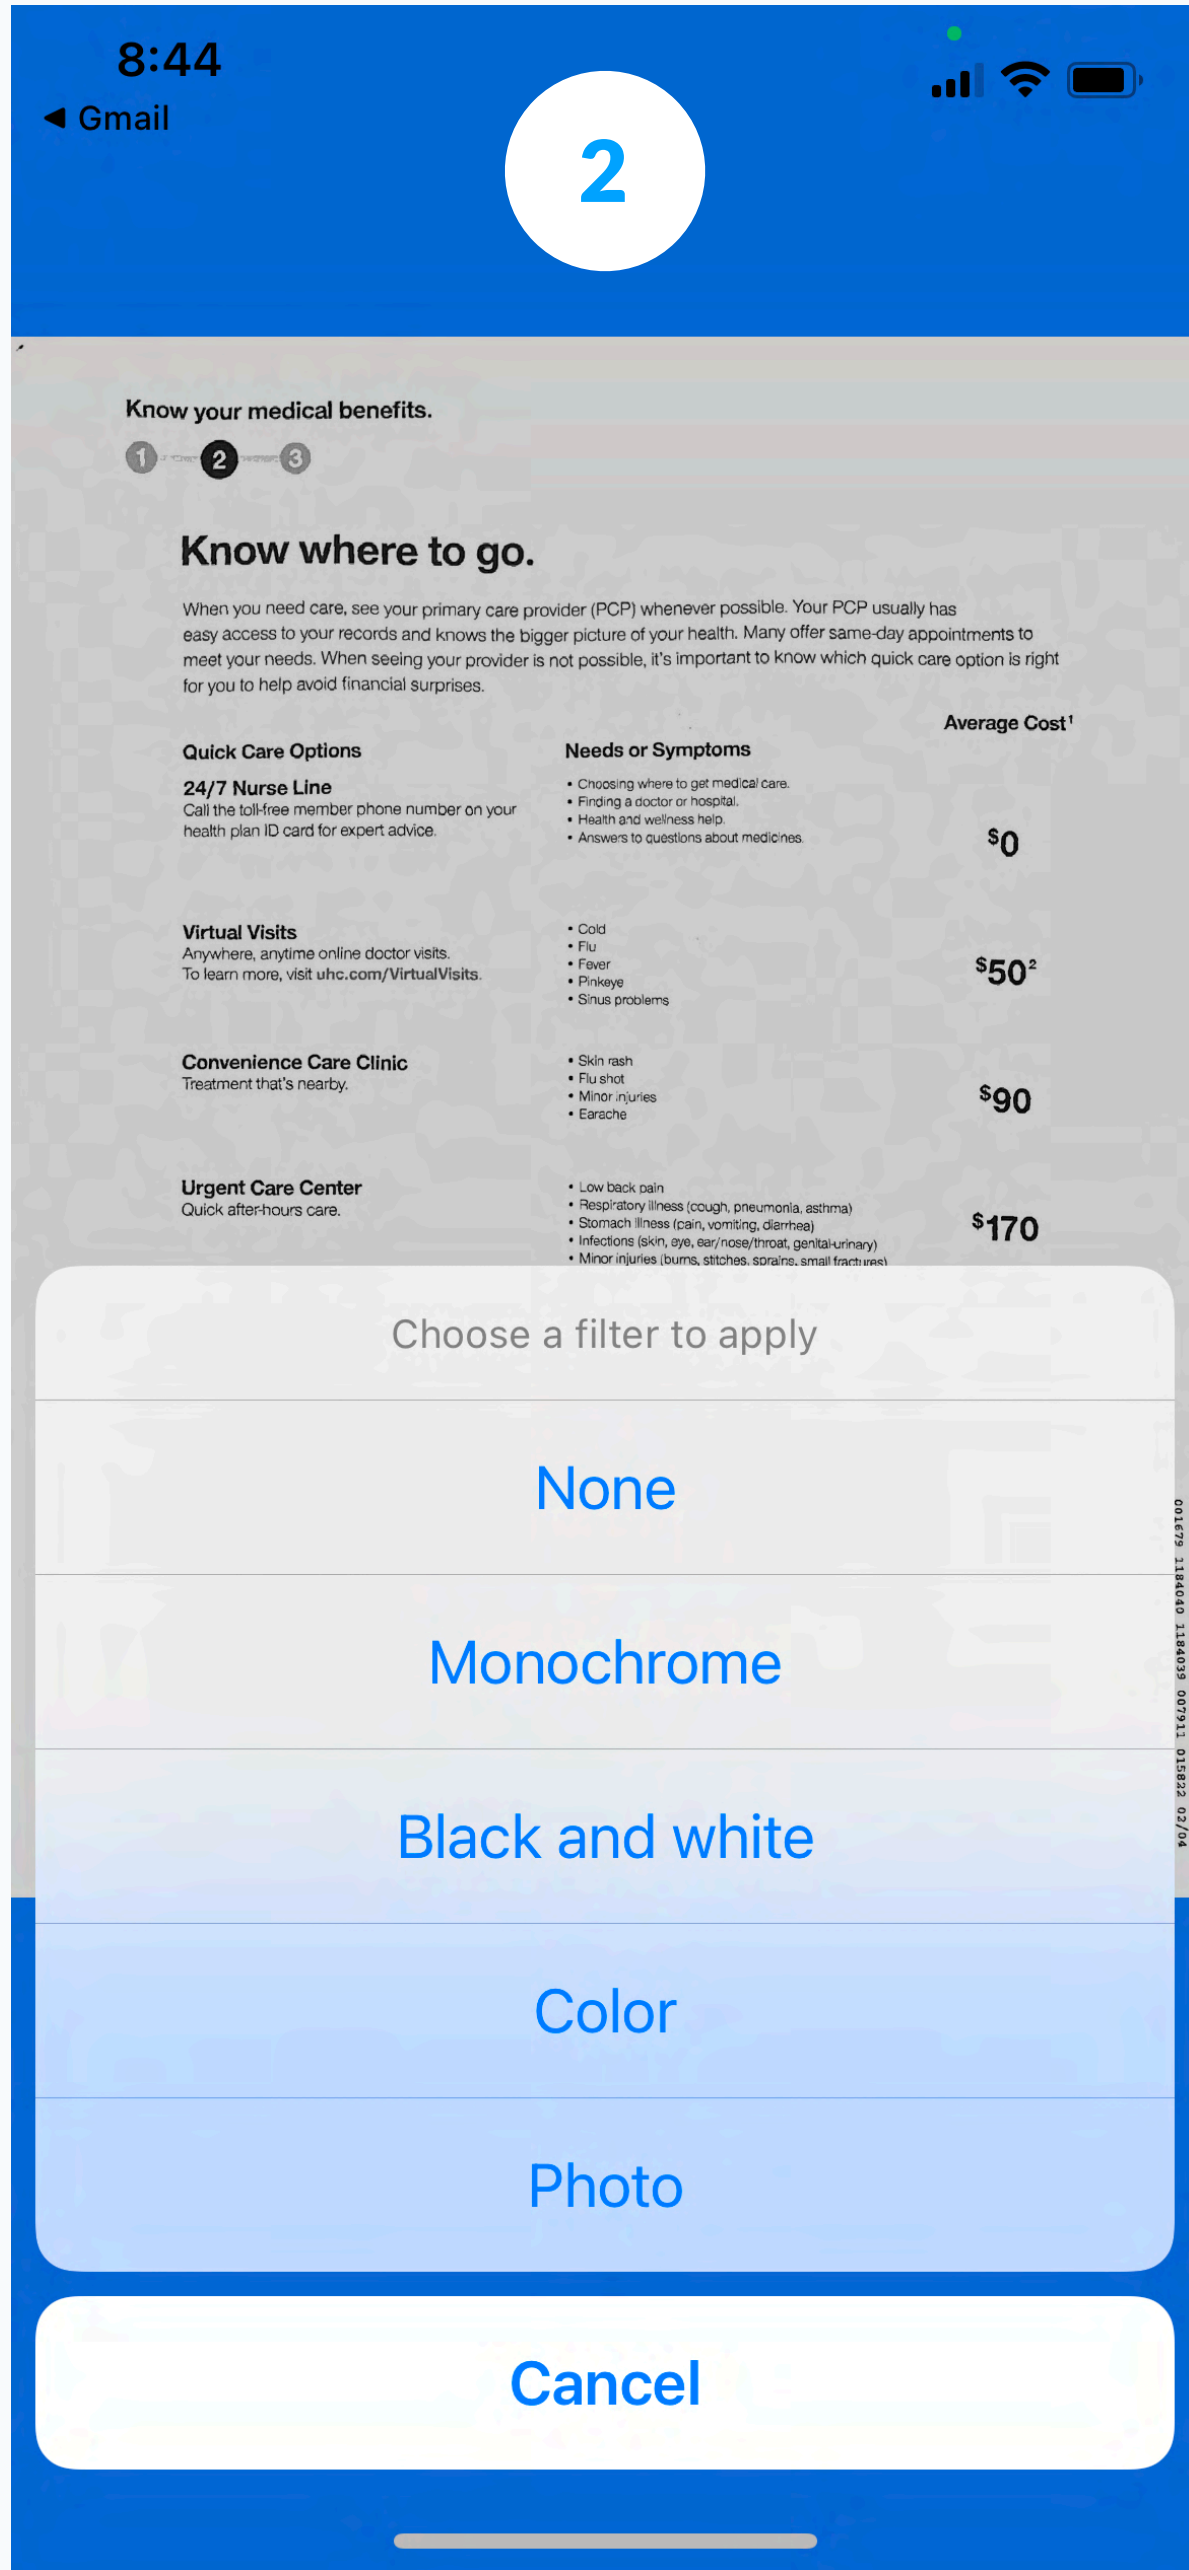

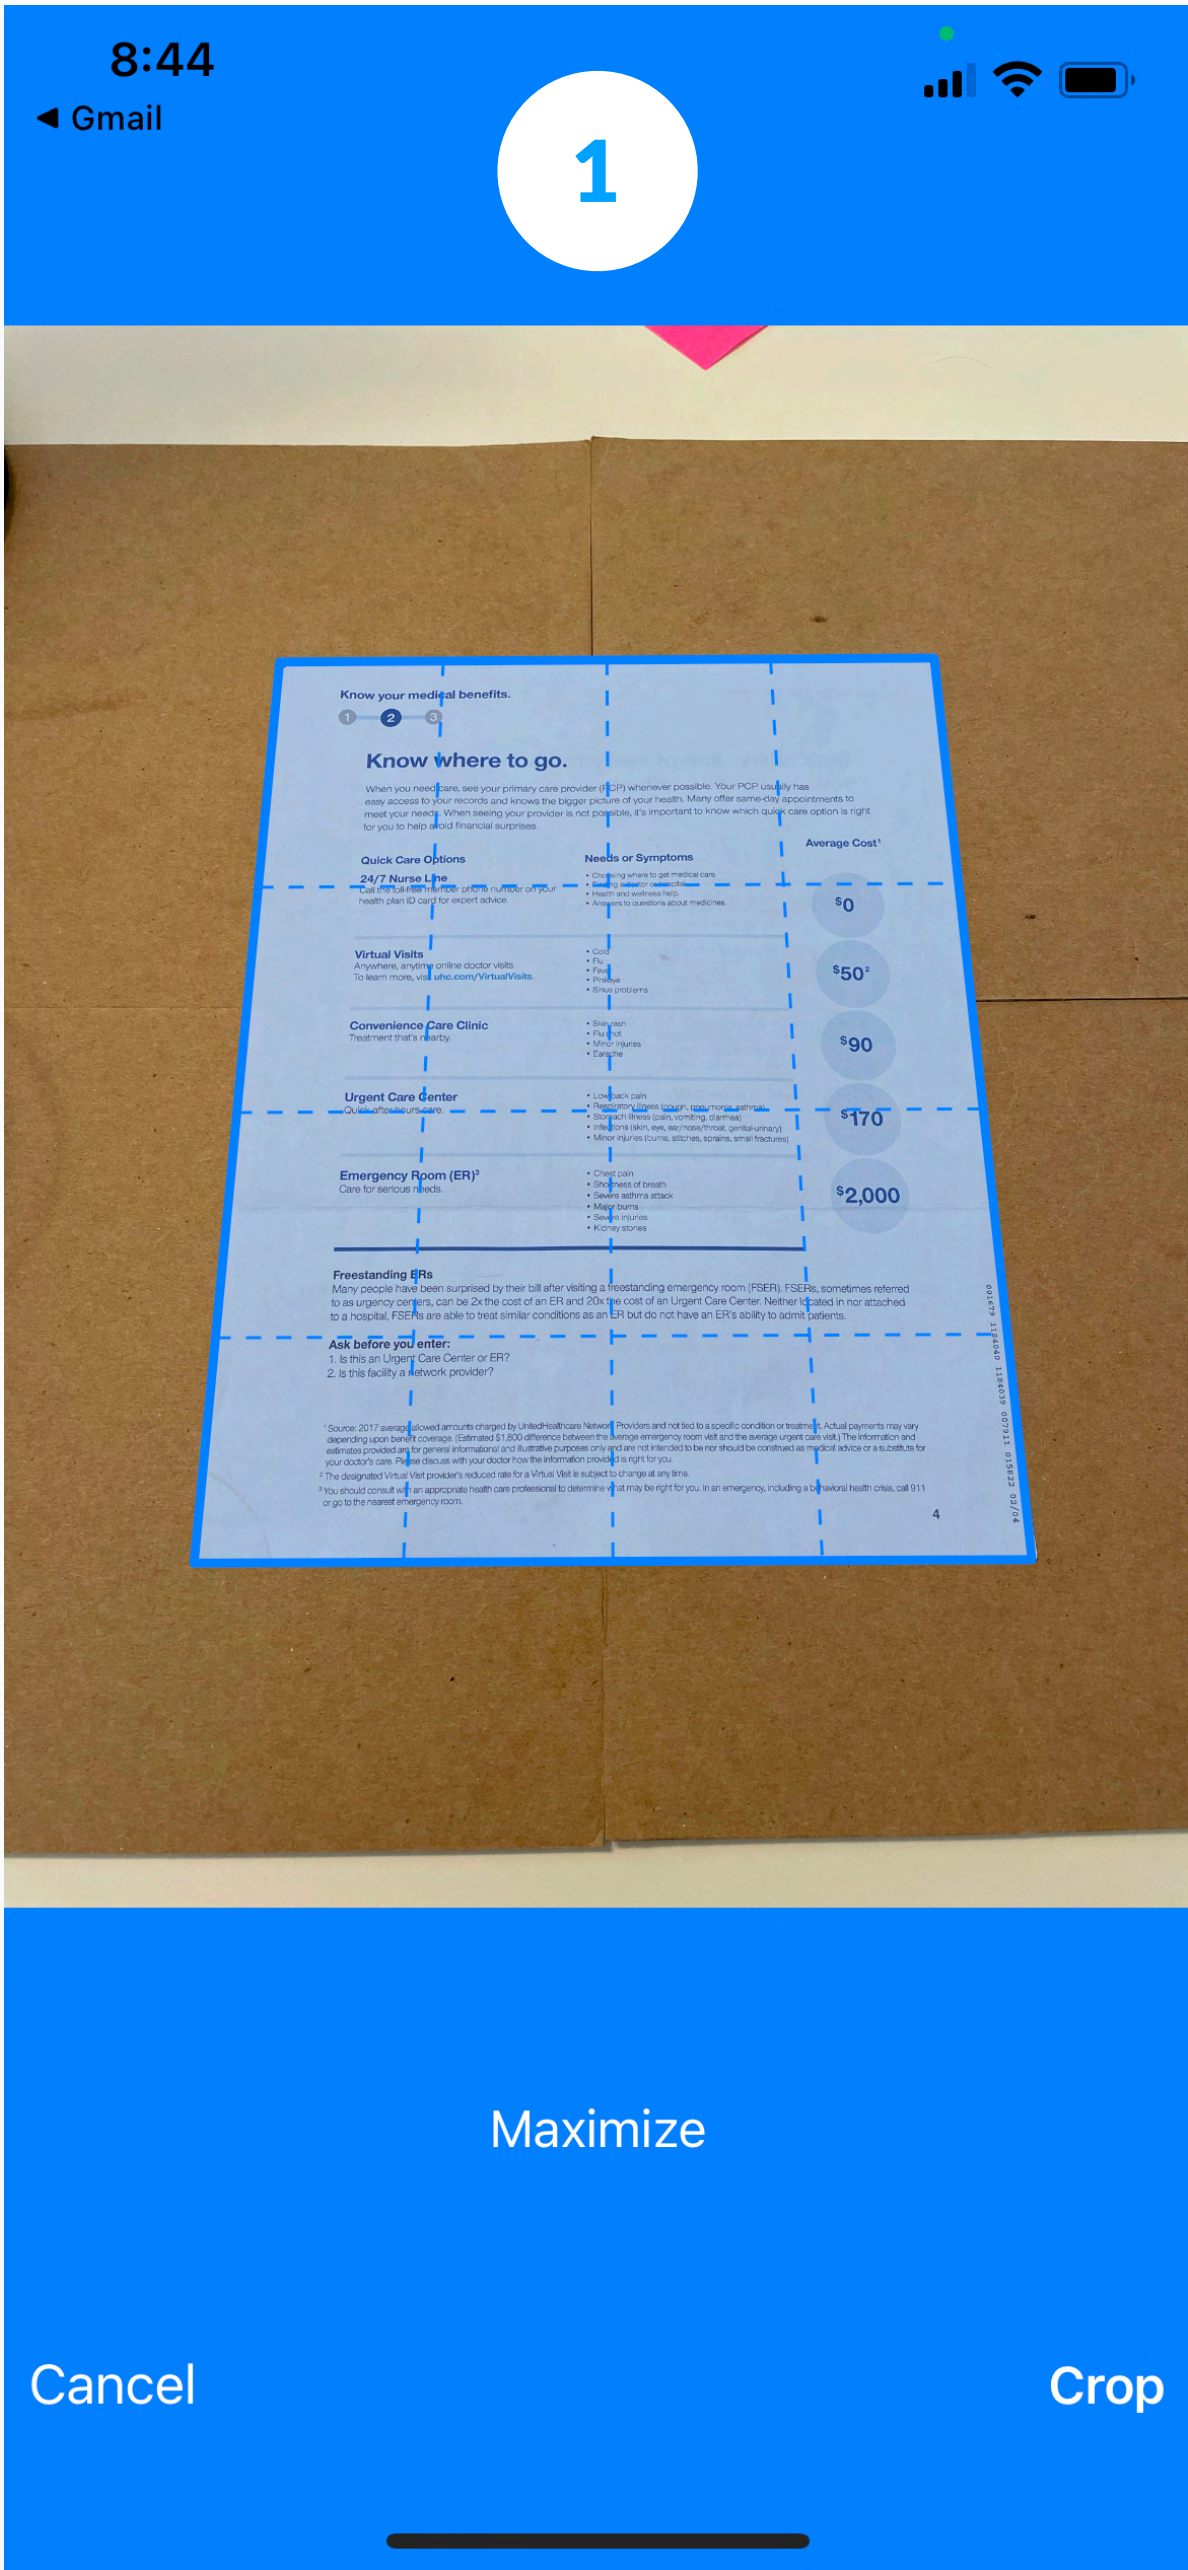

Next

CONTINUE SCANNING

ADJUST CROPPING

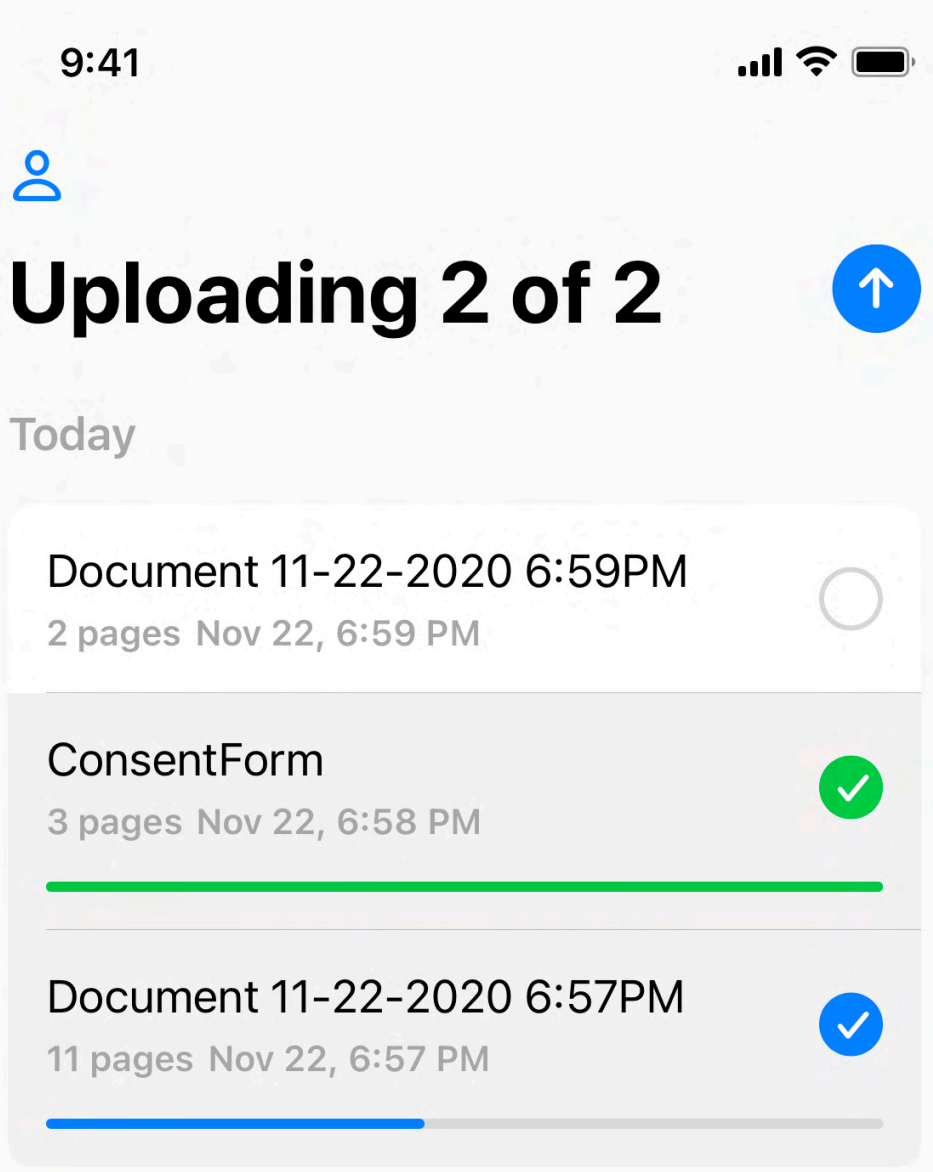

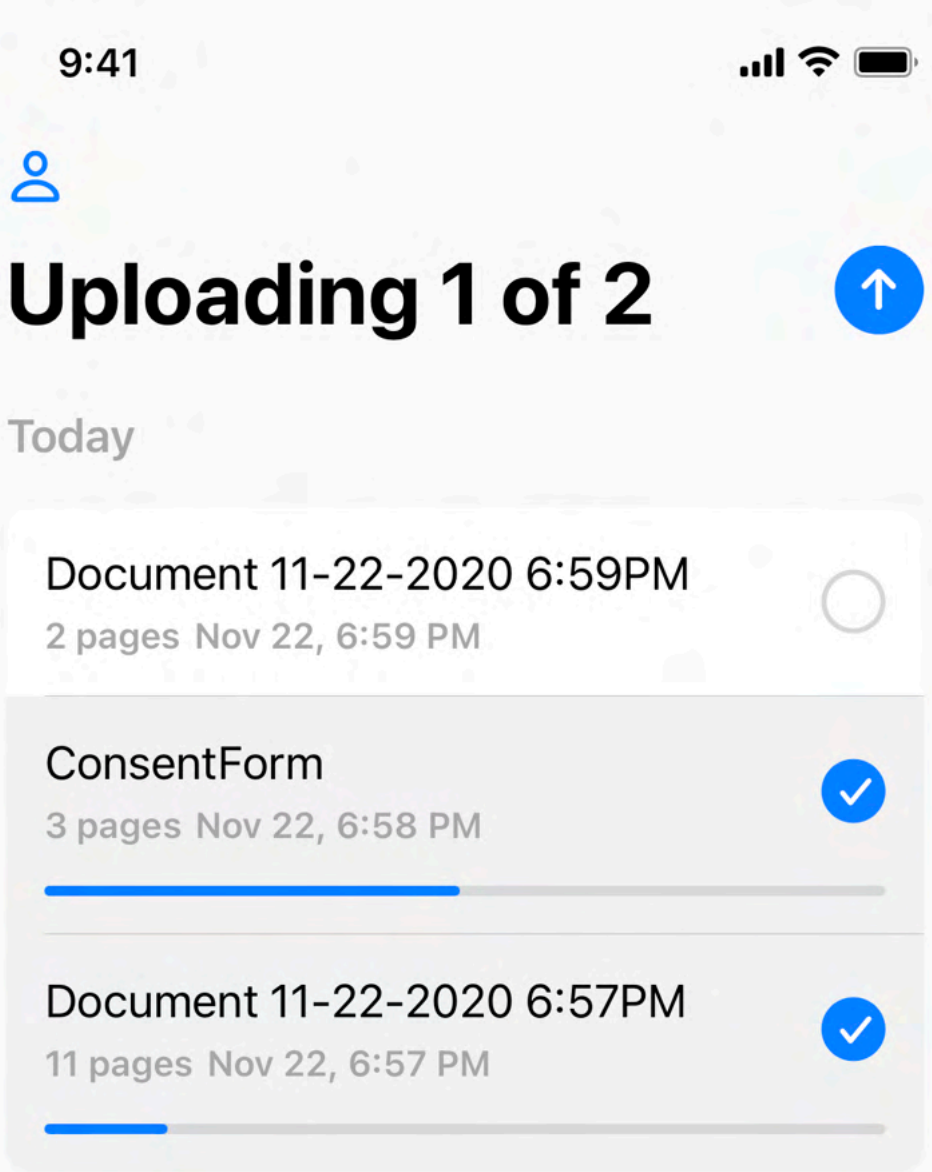

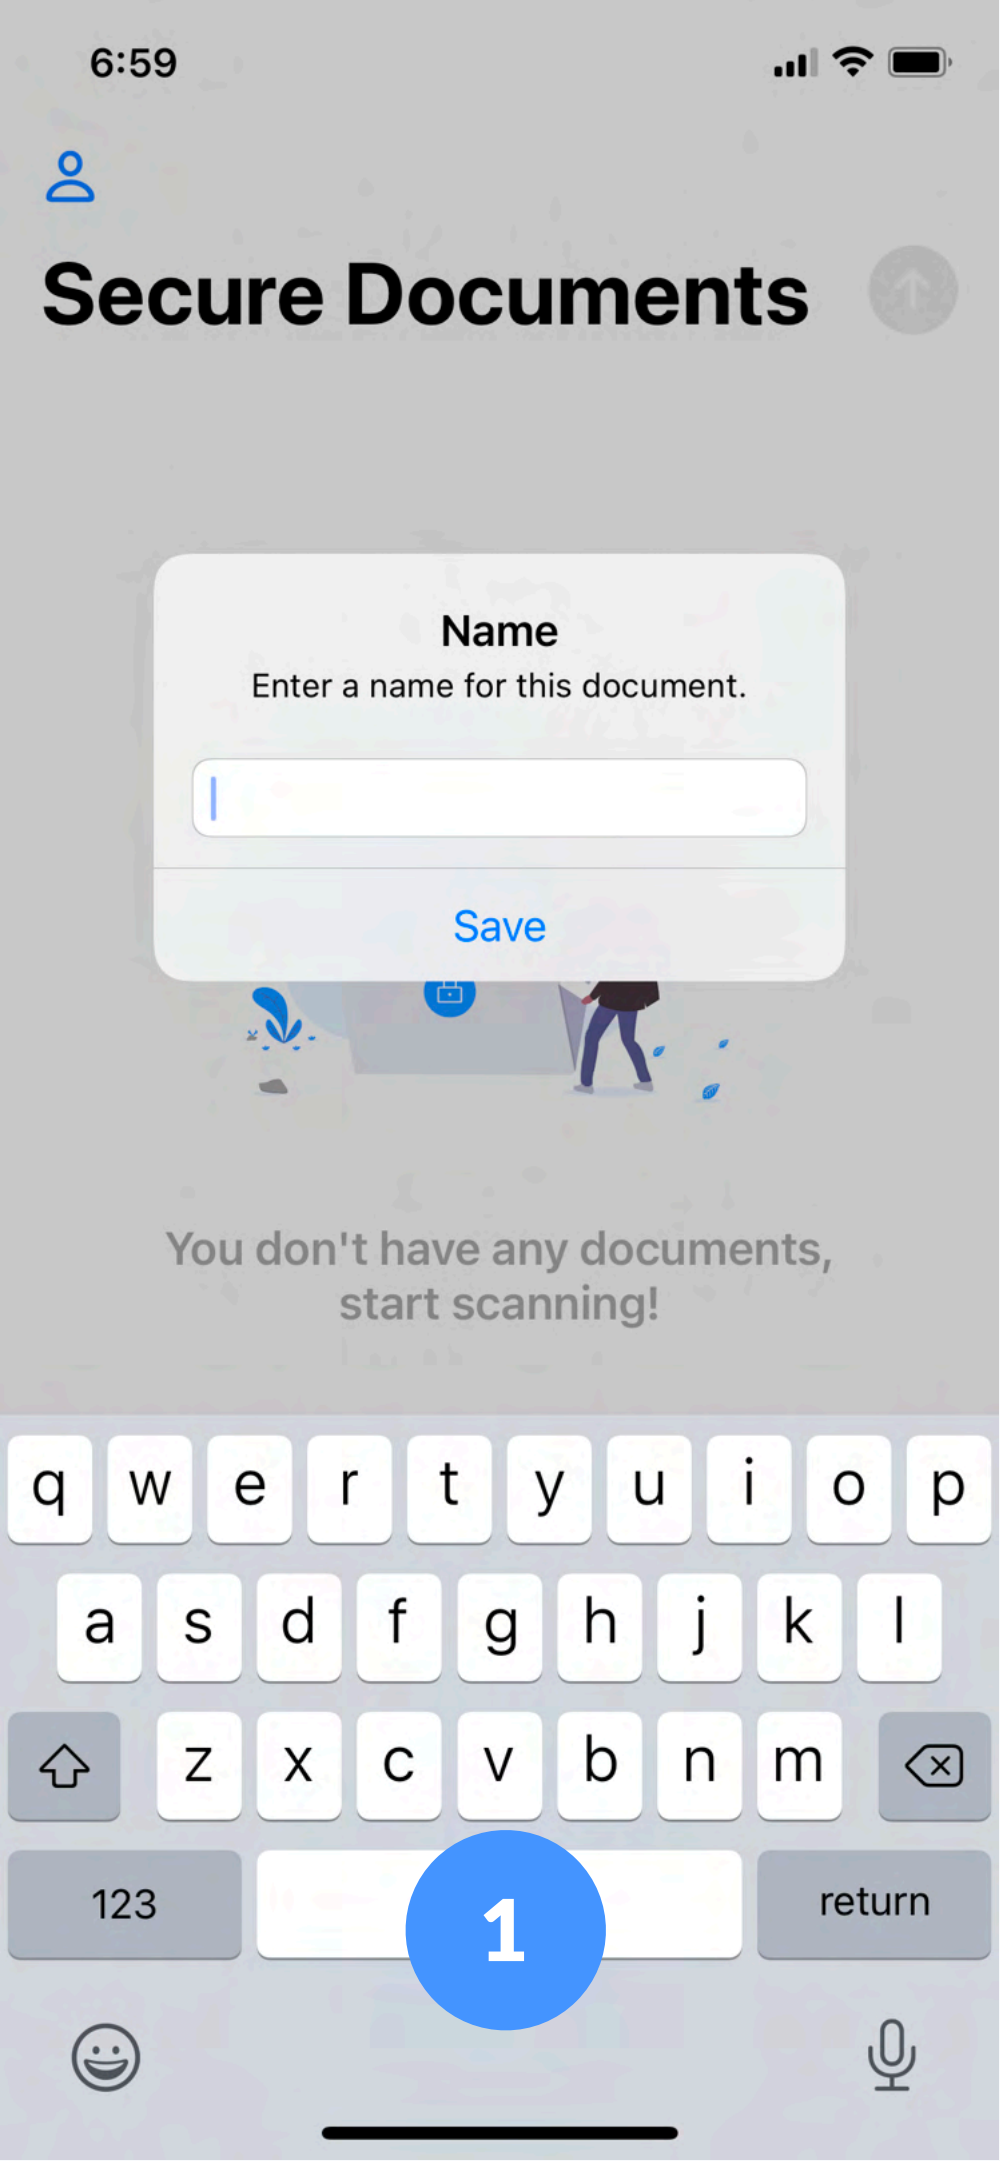

- 1 ADJUST CORNERS BY DRAGGING EDGES
- 2 APPLY FILTER

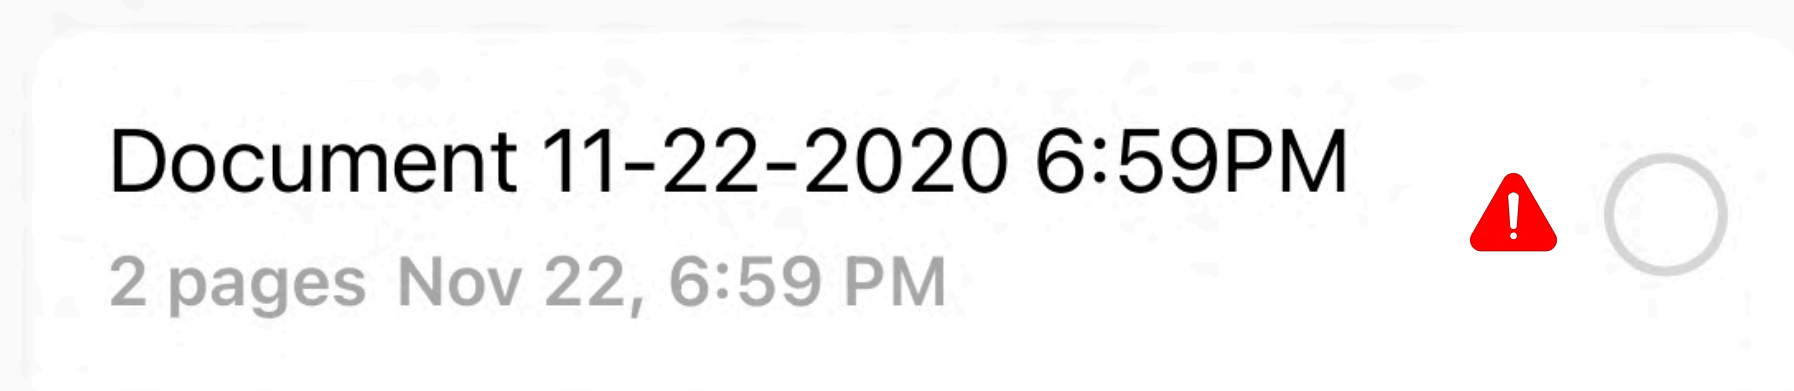

UPLOADING

SAVING/UPLOADING

- 1 ENTER A NAME, OR PRESS SAVE TO USE THE TIMESTAMP AS THE NAME
- 2 SELECT DOCUMENTS TO UPLOAD BY TAPPING THE CIRCLE INDICATOR NEXT TO THE DOCUMENT NAME, THEN PRESS THE UPLOAD BUTTON IN THE TOP RIGHT CORNER
- 3 SUCCESSFULLY UPLOADED DOCUMENTS GET REMOVED FROM THE DEVICE

UPLOAD FAILURES & DELETING A DOCUMENT

Why did my document fail to upload?

The most common cause of upload failures is loss of internet connection. If your document does not upload, first check that you have an active internet connection on either WiFi or cellular. Documents are not removed from the device until they are successfully uploaded, so you are able to upload them at a later time if needed.

How can I delete a document I no longer want?

To delete a document, swipe on the document cell from the far right all the way across the screen. You will be prompted to confirm as this action is permanent.
